J. D. Sr. Sec. School Hisar

 Rishi Nagar Hisar (HR)

PROJECTS

Letzpe Payment Gateway CRM

 <https://www.letzpe.com/crm/jsp/index>

Worked on the Letzpe payment gateway project, which aimed to provide secure and efficient online payment processing solutions for businesses. Developed and enhanced a comprehensive Customer Relationship Management (CRM) system tailored for a payment gateway platform. Contributed to multiple key modules, ensuring seamless user interaction and functionality.

- Developed front-end user interfaces using HTML, CSS, JavaScript and jQuery.
- Collaborated with the development team to implement payment processing logic and integrate the API with backend systems.
- Designed and implemented user interfaces for dashboard, reporting, and user management modules, supporting roles such as admin, subadmin, merchant, and end-users.
- Worked on critical features like payouts, nodal transfer, and transaction routing, optimising functionality and user experience.

PROJECTS

Letzpe Official Website

 <https://www.letzpe.com>

Contributed to the development of Letzpe's official website, ensuring it is user-friendly, responsive, and visually engaging.

- Designed and developed responsive web pages and user interfaces using React.js, ensuring an optimal experience across devices and screen sizes.
- Collaborated with the design team to implement consistent visual elements and a seamless user experience.
- Integrated payment processing functionalities and optimized website performance for improved user engagement.
- Enhanced website performance using code optimization techniques, reducing load times and improving user engagement.
- Implemented reusable and modular components, ensuring maintainable and scalable code.

School Fee Management System

 <https://liveschool.saralfee.com/school/login>

- Developed user authentication and authorization features to support five different user types: Super Admin, School Admin, Teacher, Student, and Parent.
- Integrated features for Super Admins to manage multiple schools, including user management, school profile settings, and access control.
- Integrated payment gateways to facilitate secure online fee payments, ensuring encryption and compliance with industry standards.
- The platform ensures efficient management and execution of transactions.

Saral Fee Official Website

 <https://www.saralfee.com/>

- Designed and implemented intuitive user interfaces for parents, students, and administrators to facilitate fee payment, receipt generation, and financial reporting.
- Conducted usability testing and gathered feedback to iterate on features, improving the overall user experience and functionality of the platform.
- Utilized front-end technologies such as HTML, CSS and JavaScript to build responsive and user-friendly interfaces.
- Implemented automated fee reminder emails, and improved cash flow for partner schools.

Domestic Money transfer (DMT)

 <https://dmt.letzpe.com/crm/jsp/index>

- The DMT (Domestic Money Transfer) project facilitates seamless money transfers within domestic regions.
- It includes five user types: Super Admin, Admin, Super Distributor, Distributor, Sales and Retailer.
- It provides a user-friendly solution for secure and reliable domestic money transfers.
- The platform ensures efficient management and execution of transactions.

Ex2Pay Payment Gateway CRM

 <https://www.ex2pay.com/crm/jsp/login>

Worked on the Ex2Pay payment gateway project, which aimed to provide secure and efficient online payment processing solutions for businesses. Developed and enhanced a comprehensive Customer Relationship Management (CRM) system tailored for a payment gateway platform. Contributed to multiple key modules, ensuring seamless user interaction and functionality.

BetaPays Payment Gateway CRM

 <https://www.betapays.co/crm/jsp/login>

- Developed front-end user interfaces using HTML, CSS, and JavaScript.
- Collaborated with the development team to implement payment processing logic and integrate the API with backend systems.
- Conducted testing and debugging to ensure the reliability and performance of the payment gateway across different browsers and devices.
- Implemented new features and enhancements that improved the overall efficiency of the payment processing system.
- Designed and implemented user interfaces for dashboard, reporting, and user management modules, supporting roles such as admin, subadmin, merchant, and end-users.
