KEY PROJECTS

Letzpe Payment Gateway CRM

Developed and enhanced the Letzpe Payment Gateway CRM to enable secure and efficient online payment processing for businesses. Built and optimized core CRM modules tailored for payment gateway operations, ensuring seamless user experience and reliable system functionality.

- Developed front-end user interfaces using HTML, CSS, JavaScript, and jQuery.
- Collaborated with the development team to implement payment processing logic and integrate REST APIs with backend systems.
- Designed and implemented user interfaces for dashboard, reporting, and user management modules, supporting Admin, Subadmin, Merchant, and End Users.
- Developed and enhanced critical features including payouts, nodal transfers, and transaction routing, optimizing functionality and user experience.

KEY PROJECTS

Letzpe Official Website

Developed and maintained Letzpe's official website, ensuring it was user-friendly, responsive, and visually engaging.

- Designed and developed responsive web pages and user interfaces using React.js, ensuring optimal performance across devices and screen sizes.
- Collaborated with the design team to implement consistent visual elements and deliver a seamless user experience.
- Integrated payment processing features and optimized website performance to improve user engagement.
- Optimized website performance through code refactoring and best practices, reducing page load time.
- Built reusable and modular components to ensure maintainable and scalable code.

School Fee Management System

- Developed user authentication and authorization features to support five different user types: Super Admin, School Admin, Teacher, Student, and Parent
- Integrated features for Super Admins to manage multiple schools, including user management, school profile settings, and access control
- Integrated payment gateways to facilitate secure online fee payments, ensuring encryption and compliance with industry standards
- The platform ensures efficient management and execution of transactions

Saral Fee Official Website

- Implemented intuitive user interfaces for parents, students, and administrators to facilitate fee payment, receipt generation, and financial reporting
- Conducted usability testing and gathered feedback to iterate on features, improving the overall user experience and functionality of the platform
- Utilized front-end technologies such as HTML, CSS and JavaScript to build responsive and user-friendly interfaces
- Enforced automated fee reminder emails, and improved cash flow for partner schools

Domestic Money transfer (DMT)

- The DMT (Domestic Money Transfer) project facilitates seamless money transfers within domestic regions
- It includes five user types: Super Admin, Admin, Super Distributor, Distributor, Sales and Retailer
- It provides a user-friendly solution for secure and reliable domestic money transfers
- The platform ensures efficient management and execution of transactions

Ex2Pay Payment Gateway CRM

- Worked on the Ex2Pay payment gateway project, which aimed to provide secure and efficient online payment processing solutions for businesses
- Improved and upgraded a comprehensive Customer Relationship Management (CRM) system tailored for a payment gateway platform
- Contributed to multiple key modules, ensuring seamless user interaction and functionality
